PROFESSIONAL SUMMARY

Recent Computer Science graduate with strong analytical, problem-solving, and communication skills. Quick learner with a passion for technology and continuous learning. Eager to contribute to a collaborative team, take on new challenges, and grow professionally while delivering high-quality solutions.

TECHNICAL SKILLS

Programming: Java, JavaScript (ES6+), TypeScript, Python, C, SQL

Frontend & Backend: React.js, HTML5, CSS3, Spring Boot, Spring Framework, Spring MVC, Spring Security, Hibernate, JPA, JDBC, RESTful APIs, Microservices, JWT, OAuth 2.0

Databases, Cloud & Tools: MySQL, PostgreSQL, MongoDB, Redis, Google Cloud Platform (GCP), Docker, Kubernetes, Git, GitHub, Maven, Gradle, Apache Kafka, CI/CD, JUnit 5, Mockito, Postman, Swagger/OpenAPI, OOP, DSA, DBMS, OS, Computer Networks, Design Patterns, Multithreading, System Design

EDUCATION

B.E. Computer Science and Engineering

2021 – 2025

Ramco Institute of Technology, Tamil Nadu

CGPA: 7.15 / 10

PROJECTS

Weather Forecast Application

GitHub Repository

React.js, Spring Boot, MySQL, REST API, Weather API, Axios

- Built a full-stack weather application with a React.js frontend and Spring Boot REST backend integrated with a third-party Weather API.
- Implemented live weather search allowing users to fetch real-time weather data for any city instantly.
- Designed a search-history feature to store and retrieve past searches by date, using MySQL for persistent storage with REST endpoints to filter by date range.
- Used Axios for asynchronous API calls and built a responsive, mobile-friendly UI with dynamic loading states and error handling.
- Applied clean MVC architecture and structured exception handling to ensure reliable API integration and smooth data flow between frontend and backend.

Student Management System

GitHub Repository

Java, Spring Boot, Hibernate, JPA, MySQL, HTML, CSS, JavaScript, Bootstrap

- Developed a full-stack web application to manage student records, attendance tracking, and academic information.
- Built RESTful APIs and implemented CRUD operations using Spring Boot, Hibernate, and JPA.
- Designed responsive user interfaces using HTML, CSS, Bootstrap, and JavaScript, following MVC architecture throughout.
- Implemented input validation and centralized exception handling to improve data integrity and API reliability.
- Tested all API endpoints using Postman and used Git/GitHub for version control throughout development.

ACHIEVEMENTS

TCS iON National Qualifier Test (NQT) — Ninja Band

Feb 2026

Score: 1659.88 / 3000 — Percentage: 55.33% — Language: Java

- Regularly solve coding challenges and DSA problems in Java to strengthen logical thinking and debugging skills.
- Built full-stack projects applying Java, Spring Boot, React, and database concepts in practice.

INTERNSHIP EXPERIENCE

Java Developer Intern — Oasis Infobyte

Feb 2026 – Mar 2026

- Developed Java-based applications using object-oriented programming principles and modular coding practices.
- Built projects including an ATM Simulation, Reservation System, and Online Examination Platform from design through deployment.
- Debugged and optimized application logic, improving performance and reducing runtime errors.
- Strengthened practical understanding of backend development and the Java application lifecycle.

CERTIFICATIONS

- Java Full Stack Development Training — QSpiders
- The Bible of Competitive Programming and Coding Interviews — Udemy
- Hands-on training in Spring Boot, REST APIs, MySQL, and frontend integration
